

Technical Specification

PRD Pole Drill Rig

A Conquering Earth hole drilling rig capable of drilling large diameter DTH drilling to a depth of 15mtrs, it can be mounted on a truck and trailer the PRD POLE DRILL is used in various applications like Pole erection, polite hole oil and gas special purpose construction applications.

Note: The images provided here are for reference only and do not depict the exact specification outlined in this document.

| Capacity | Hole Diameter : 450 - 1200 mm (17"- 47") diameter |
|-----------------------------|---|
| | Maximum Depth : 15 m @ 1200 mm |
| Drilling Application | Pole drill |
| Drilling Method | DTH |
| Prime Mover* | Rig hydraulic system is powered with Suitable Deck Engine-260 hp |
| Mounting Platform Structure | Heavy I and C section welded steel structure covered with 5mm chequered plate |
| Mast Assembly | Strong structural steel twin tubular box type construction |
| | Mast Overall Length: 7000 mm |
| | Rotary Head Travel: 6000 mm |
| | Centralizer Opening: 22" (560 mm) |
| Mast Raising Cylinder | Mast is raised and lowered by four hydraulic cylinder |
| Mast Dumping | Mast is provided with forward dumping arrangement |
| Feed System | 1 x Double acting hydraulic cylinder with 1:1 feed system |
| | Pull Up Force : 20000 kgf (44000 lb.f) @ 160 bar |
| | Pull Down Force : 8500 kgf (18700 lb.f) @ 160 bar |
| | Pull Up Speed: 20 m/min |
| | Pull Down Speed: 30 m/min |

| Fabricated steel body with spur gear reduction and oil bath lubrication type gearbox along with top air entry and spindle thread connection of API 6 5/8 REG. Rotary Head travels on mast assembly and absorb sudden shock loads encountered during drilling operation. Driven by four hydraulic motor to attain maximum torque. Maximum Torque: 14000 Nm Rotation Speed: 0 - 50 rpm Fine controlled 2 x variable displacement piston pump for Feed & Rotation 2 x fixed displacement pump for Hydraulic cooler, Auxiliary operations Maximum System Pressure: 2320 psi (160 bar) Hydraulic Oil Cooler: 120 gpm Hydraulic Tank Capacity: 850 litres Centralized control panel is at rear end of the equipment for convenient view of drill table provided with all necessary gauges, control system and emergency switch. A portable joystick panel is provided for remote operation to keep the operator away from the dust. 6 x Hydraulic levelling jacks are provided for quick setting and levelling with heavy duty telescopic guides. Locking check valves for safety with adequate capacity to withstand load Hydraulic operated water injection triplex pump with necessary fittings, pressure regulator, check valve and suction filter are provided Maximum Flow: 80 lpm Maximum Pressure: 40 kg/sq.cm | | |
